

WATCH US GROW

12 Months to 24 Months

Every child grows and learns new things at his or her own pace. Children may vary by as much as 6 months in some things they are able to do. If you have any concerns about your child's development, you should speak with our Director.

Children can build a tower of blocks, use hand motions for what they want, can say several words, can roll a ball back to you, can imitate things they see, can turn pages in a book, can walk, can climb stairs (on hand and knees), and can pick up tiny objects like Cheerios. Children can also name one picture, can say 5-6 words, will point to picture in a book, can follow simple directions, can take off shoes and socks, can point to body parts, can show affection, can scribble on a piece of paper, can take off coat, can jump in place, can walk downstairs, can match sounds to animals, know more than 20 words, will listen to a story for a short period of time, can use a spoon and cup well with little spilling and begin to draw in a circular motion.

Our Vision

Our staff members are trained to be recognized leaders in providing TLC and extraordinary educational programs. We pride ourselves on our distinctive blend of fun and learning in a safe and nurturing environment.

At this stage we will help to develop fine and gross motor skills by teaching children how to hold a crayon, throw a ball, jump and follow simple directions. We will help them create artwork according to their levels and abilities. We will show them affection and give encouragement throughout the day. We read stories to them with enthusiasm, get them exercising with moving arms, legs, etc., and begin to teach colors and shapes.
