

WATCH US GROW

Infants to 6 Months

Every child grows and learns new things at his or her own pace. Children may vary by as much as 6 months in some things they are able to do. If you have any concerns about your child's development, you should speak with our Director.

Children can recognize a parent's smile and can turn their head to watch a toy move. Your child can make sounds, watch the person talking to him or her, can lift their head and begin to roll over. Your child can watch his or her own hands and things around them, can laugh, can show displeasure at the loss of a toy, shows interest in trying foods other than milk, can roll from back to stomach and can hold their head up.

Our Vision

Our staff members are trained to be recognized leaders in providing TLC and extraordinary educational programs. We pride ourselves on our distinctive blend of fun and learning in a safe and nurturing environment.

During this stage of development we talk and sing to your child, we play with them and show tender loving care. We make sure they are fed properly and that their diaper is changed regularly.
